#### 2. Project Summary and Objectives

Project Objective is to increase access to improved water supply and sanitation services in selected pourashavas (municipalities) and strengthen the pourashavas' institutional capacities for delivering water and sanitation services. The project is to improve: (i) waters supply and sanitation systems to improve living conditions of about 600,000 people, and at least 150,000 people respectively in selected 30 municipalities; and (ii) water services and management skills of implementing agencies' staff, e.g. DPHE, and other public and private sector agencies".

#### 3. Key Dates

Approval:	Jul. 11, 2019	Signing:	Dec. 11, 2019
Effective:	Mar. 05, 2020	Restructured (if any):	
Orig. Closing:	Dec. 31, 2024	Rev. Closing (if any):	

#### 4. Disbursement Summary (USD million)

Contract Awarded:		Cancellation (if any):	13.00		
Disbursed:	49.43	Latest disbursement (amount/date):	4.87/Dec. 20, 2023		
Undisbursed:	37.57	Disbursement Ratio (%) <sup>1</sup> :	56.82		

#### 5. Project Implementation Update

The project component of Sector Support and Capacity Strengthening has made some progress, including the implementation of WSS accounting software and progress on billing and payment interfaces; the adoption of municipal WSS bylaws and tariff fixation; and the formal establishment of the Municipal Support Circle (MSC). However, overall development in piped water supply and sanitation has been modest. The mission confirmed that project activities and agreed targets for the Investment for Water Supply Infrastructure and Improving Sanitation and Drainage components are unlikely to be achieved within the remaining implementation period. At this time, there is a risk of slippage in the construction of some piped water schemes and sanitation installations (including improved household toilets and integrated waste management facilities) that have not progressed as per the agreed work plan and may require up to 12 months beyond the current closing date to complete. The delays in completion of piped water supply systems and household toilets since the previous site visit, pose a risk to the achievement of the project objective on access to improved water supply and sanitation services. The mission assessed that based on the current rate of progress, at least 10 municipalities will be unable to commission their water supply service systems by original project closing. Sanitation systems (household

<sup>&</sup>lt;sup>1</sup>Disbursement Ratio is defined as the volume (e.g. the dollar amount) of total disbursed amount as a percentage of the net committed volume.

toilets, public toilets, desludging and treatment systems) are likely to be in place in many municipalities but not witness a period of reasonable operational practice by the closing date. Hence, while the project will achieve its objective in sector support and capacity strengthening component, it is highly likely to fall short of achieving the target beneficiaries by the current closing date. The performance of the project implementation will be closely monitored by the project team to ensure timely delivery of the agreed actions.

The Mission agreed with the PMU that since the time available for municipalities to utilize rewards is less than 12 months now, the proposed third round of performance assessment needs to be cancelled. In November 2024, the PMU will conduct an endline assessment of the project using these resources and also modify the ToRs to include the measurement of specific result areas and mpacts. The proposal for the TSU contract modification was reviewed by the World Bank and provided with No Objection and is expected to be approved by March 15, 2024.	reviewed, and the GAP monitoring report was updated. •Twenty-eight (28) municipalities received disaster management training and as a result of the training, 28 gender sensitive contingency plans were developed by the municipalities. •TSU organized training for labors on Code of Conduct (CoC) in all municipalities to ensure safe workplace. •Ten (10) Focused Group Discussion (FGD) meetings were organized in 3 municipalities to increase women's participation in project activities. •The PMU will submit a Social Management Plan (SMP) that would compile the information and analysis from/relevant to the extensive consultation, training and awareness raising that the PMU has continuously conducted; the screening process; establishment of cut-off dates, inventory of losses, system/process for making compensation payments or reconstruction (with an organogram), including the Grievance Redress Mechanism (GRM) (with roles and responsibilities), gender/Gender- based Violence (GBV) considerations, amongst others by August 25, 2023. •The PMU needs to improve the critical environmental and Occupational Health and Safety (OHS) issues during the project	draft report for the feasibility study fo additional municipalities is complete and a revised version is being reviewed This contract is expected to be awarded by May 30 2024. •Completion of TSU contract modification/extension by April 15, 2024

Reporting Period From 2023/07 To 2024/04

	for the feasibility study for additional municipalities is complete and a revised	practices. •The PMU is requested to hire and mobilize individual environmental consultant to enhance	
	version has been reviewed by the Bank. This contract is expected to be awarded by April 2024. The contract will go beyond	Environmental Safeguards management capacity of the project.	
	contract will go beyond the project closing. The DPHE is expected to adequately manage this contract in order to		
	keep the timeline for delivery without any slippage. The DPHE shall assess carefully how many of the municipal		
	feasibility studies can be comfortably covered within remaining project period and work with the selected		
	consulting firm to have this scope delivered by the project closing and pay for it under this project		
	project. The project monitoring and data-backed reporting have improved since last		
	review mission in July 2023. The DPHE has adopted a uniform progress reporting format with the		
	provision of web-based real time implementation tracking.		
Component 5: Contingent Emergency Response (USD0 million, n/a)	N/A		N/A

#### Financial Management:

The PMU has submitted quarterly IUFRs on time. The latest external audit for FY The bank has received the 2022–23 submission on time. The next audit report for FY 2023–24 will be due on December 31. 2024. The issued audit report confirms that PMU has identified three significant audit issues. The PMU will complete the appropriate actions to resolve the issues by June 30, 2024. The PMU will submit the final internal audit on the operations of the municipality by May 2024.

Reporting Period From 2023/07 To 2024/04

#### 6. Status of the Grievance Redress Mechanism (GRM)

Since the implementation, a total of twenty-six (26) grievances received by the Projects and grievances were resolved before March 31, 2024, Among the 19 complains were related to damaged walls of some houses and shops during drainage construction work and 6 grievances were miscellaneous.

Name: Mr. Lutfor Rahman Designation: Senior Social Development Officer and GRM focal person, BMWSSP Cell No. +8801868009771 E-mail address: Irdphe67@yahoo.com

7. Results Monitoring (please refer to the full RMF, which can be found on the last page of this PIMR) Some indicators are delayed in achieving its annual target due to the COVID19 pandemic disruptions. An intermediate indicator is progressing to reflect procurement and physical progress. Target values are set-up for achievement at project closure.
